SCIENCE in ACTION

Annamalai Karthikeyan pours premixed chemicals into some paper waste.

Annamalai Karthikeyan stirs the premixed chemicals and paper waste.

The paper waste converts into activated carbon before Annamalai Karthikeyan finishes pouring the chemicals.

Some steam comes up as Annamalai Karthikeyan stirs the chemicals into the paper waste producing activated carbon.

Within seconds, the paper waste has completely converted into activated carbon.

Oshkosh scientist creates activated carbon from waste materials

By Jeff Bollier | Oshkosh Northwestern Media

If you've got \$3 million to invest in a startup, Annamalai "Karthik" Karthikeyan would like to have a word with you about activated carbon.

ON THE WEB ...

To see a video demonstrating Annamalai Karthikeyan's process to create activated carbon, log on to www.thenorthwestern.com.
